ABOUT BRAIN Biotech AG

The BRAIN Biotech Group is a leading company in the research, development and production of specialty enzymes with a focus on the food and life science industries. In addition, the Group develops microbial production organisms and scalable bioprocesses for the economic production of specialty enzymes and other proteins. Customized innovative biological solutions for more sustainable products and processes round off the portfolio.

The parent company of the BRAIN Biotech Group is BRAIN Biotech AG. The business activities of the integrated company are divided into the two segments BRAINBiocatalysts (development, production and distribution of specialty enzymes, microorganisms, ingredients) and BRAINBioIncubator (research-intensive development projects, pharmaceuticals). For production, the Group operates fermentation plants in the UK as well as production facilities in continental Europe and the USA.

BRAIN Biotech has been listed on the Frankfurt Stock Exchange since February 9, 2016 (Ticker: BNN; ISIN DE0005203947 / WKN 520394). The company employs around 300 people at several locations and generated revenues of EUR 54.6 million in the 2023/24 financial year. Further information can be found at: www.brain-biotech-group.com.

INTERIM GROUP MANAGEMENT REPORT

1 October 2024 to 31 March 2025

I. GROUP BASIS AND GENERAL CONDITIONS

The remarks made in the consolidated financial statement for the financial year ending 30 September 2024 about the Group's basis and general conditions continue to be applicable.

II. ECONOMIC AND BUSINESS REPORT

1. Results of operations

In the first six months of the financial year 2024/2025, the BRAIN Biotech Group generated revenues of €25.2 million, down 7.2% on the previous year (€27.2 million). The decline in revenue is primarily attributable to a generally more subdued economic environment and the delays in closing new contracts for Tailor Made Solutions projects. In addition, the enzyme business only grew slightly compared to the previous year. In the second quarter of 2024/25, revenue decreased by €2.4 million from €14.5 million to €12.1 million. This is due, on the one hand, to the effects mentioned above and, on the other hand, to a one-off effect in the previous year resulting from a milestone payment of €1.5 million for the successful progress of the investigational pharmaceutical compound Deucricitibant (formerly PHA 121). Total operating performance (sales revenue, research and development grants, changes in inventories and other income) decreased by 3.3% from €27.4 million to €26.5 million in the first six months of the financial year. The lower decline compared to sales is attributable to positive changes in inventories due to scheduled stock building of raw materials.

The cost of materials amounted to €11.6 million compared to €11.2 million in the previous year. Absolute personnel expenses decreased from €12.1 million to €11.4 million compared to the previous year. This is mainly attributable to the lower number of employees following the successful spin-off of the Akribion Genomics activities and the resulting lower wage and salary payments in absolute terms. During the first quarter of the financial year, 15 employees transferred to the independent Akribion Therapeutics GmbH as part of a transfer of operations.

Other expenses increased by €0.5 million to €5.5 million compared to the previous year.

Adjusted consolidated EBITDA in the first half of the 2024/25 financial year deteriorated from €-0.5 million in the previous year to €-1.1 million. This primarily reflects the lower revenue.

The following table shows the reconciliation of unadjusted EBITDA to adjusted EBITDA.

€ thousand	6M 2024/25	6M 2023/24
EBITDA	-2,051	-913
<i>Share-based employee compensation</i>	-460	-432
<i>Redundancy costs (Personnel expenses)</i>	-508	0
<i>Redundancy costs (Other expenses)</i>	-8	0
Adjusted EBITDA	-1,074	-481

Depreciation and amortisation amounted to €2.5 million in the first half of the year, compared with €2.3 million in the previous year.

The net financial result totalled €-2.9 million, compared with €-1.2 million in the same period of the previous year, mainly driven by higher financial expenses.

The increase in financial expenses from €0.8 million to €2.7 million is due to periodic amortisation effects of the Royalty Pharma liability in the amount of €1.6 million (pure accounting, no cash-effects) and higher interest expenses due to increased borrowing compared to the previous year.

This led to a net loss for the period of €-7.2 million, compared with €-4.6 million in the same period of the previous year.

Basic and diluted earnings per share in the first six months of the financial year amounted to €-0.32, compared with €-0.21 in the same period of the previous year.

The business segments have developed as follows:

At the Capital Markets Day on 12 December 2024, BRAIN Biotech AG announced that it would be changing its previous reporting structure to two segments plus holding with the publication of the 3M quarterly figures. The following changes have been made to the segment reporting compared to the consolidated financial statements as of 30 September 2024. The 'BioScience' segment was split and the activities were allocated to the other segments as follows. BioScience Zwingenberg has been allocated to the former 'BioProducts' segment and renamed '**BRAINBiocatalysts**'. The BRAIN Biotech branch AnalytiCon Discovery has been assigned to the '**BRAINBioIncubator**' segment. The previous year's figures have been adjusted accordingly.

By combining the previous segment 'BioProducts' and BioScience Zwingenberg, BRAIN Biotech is further sharpening its focus on the enzyme business and ensuring a more efficient integration of its research activities into the product business. The successfully initiated commercialisation of the activities of the BioIncubator segment will be continued, thereby further strengthening the company's liquidity position and profitability.

Segment BRAINBiocatalysts

€ thousand	6M 2024/25	6M 2023/24
Revenue	22,745	22,542
EBITDA	700	1,423
Adjusted EBITDA	1,369	1,579

The **BRAINBiocatalysts** segment generated revenues of €22.7 million in the reporting period, representing a slight increase of 0.9% compared with the same period of the previous year (€22.5 million). Sales in this segment developed below the original forecast due to the weakening general economic environment and negative currency effects from the US dollar in the second quarter of the financial year. Adjusted EBITDA amounted to €1.4 million, down €0.2 million on the previous year due to lower sales momentum and an increased cost structure for the originally planned growth.

Segment BRAINBioIncubator

€ thousand	6M 2024/25	6M 2023/24
Revenue	2,487	4,840
EBITDA	-672	-348
Adjusted EBITDA	-672	-348

Revenue in the **BRAINBioIncubator** segment amounted to €2.5 million, down €2.3 million on the previous year (€4.8 million). The previous year's revenue was strongly influenced by a milestone payment of €1.5 million received for the deucricitibant (PHA 121) project. In addition, delays of new contracts for Tailor Made Solutions projects contributed to the decline in revenue in the current period. Personnel expenses for the segment amounted to €2.3 million, significantly below the prior-year period (€3.7 million), as the genome editing activities in the therapeutic area were spun out to Akribion Therapeutics GmbH on 1 December 2024. This is an independent company and has entered into a technology pharma licensing agreement with BRAIN Biotech AG for the application G-dase® E technology. Adjusted EBITDA deteriorated from €-0.3 million to €-0.7 million.

The **BRAIN Biotech Holding** segment mainly includes personnel expenses and other expenses for Group administration, the further development of the BRAIN Biotech Group, the stock exchange listing and M&A activities. Adjusted EBITDA for the segment amounted to €-1.8 million, which is only slightly below the previous year's level (€-1.7 million) and in line with the full-year forecast.

2. Net assets

Non-current assets increased from €43.1 million as of 30 September 2024 to €44.2 million as of 31 March 2025. This was mainly due to an increase in property, plant and equipment as a result the rights-of-use assets from a new lease agreement for a production site in the Netherlands. This is offset by ongoing scheduled depreciation and amortisation of property, plant and equipment and intangible assets.

Current assets decreased from €45.7 million to €34.9 million. This decline is mainly attributable to lower cash and cash equivalents. Among other things, a shareholder loan of €5.0 million was repaid in the first half of the year and further loan repayments were made as scheduled.

Equity decreased from €13.9 million as of 30 September 2024 to €7.2 million as of 31 March 2025. This is mainly due to the negative result for the period.

The increase in non-current liabilities from €49.8 million to €53.0 million is attributable to a rise in non-current financial liabilities. This increase includes €1.6 million from periodic (non-cash) amortisation effects of the financial liability from the Royalty Pharma transaction and €2.1 million in increased liabilities relating to the rights-of-use assets from the lease agreement for the new warehouse in the Netherlands.

Current liabilities, on the other hand, decreased from €25.0 million to €18.9 million. This was mainly due to lower financial liabilities because of scheduled loan repayments and the repayment of a shareholder loan in the amount of €5.0 million.

3. Financial position

The Group's gross cash flow amounted to €-3.4 million in the reporting period, compared with €-4.4 million in the same period of the previous year. This was mainly due to the negative result for the year after deduction of non-cash finance costs relating to the Royalty Pharma liability and timing effects from deferred income.

Cash flow from operating activities decreased from €-3.2 million to €-5.0 million. This was mainly due to reporting date effects in operating working capital and the planned build-up of inventories.

Cash flow from investing activities in the first six months of the current financial year amounted to €-0.5 million, compared with €-0.7 million in the same period of the previous year, mainly reflecting investments in property, plant and equipment.

Cash flow from financing activities amounted to €-6.9 million in the first half of the financial year, reflecting the repayment of a shareholder loan (€5.0 million) and ongoing scheduled repayments of other financial liabilities (€1.9 million).

Overall, cash and cash equivalents decreased from €27.2 million as of 30 September 2024 to €14.9 million, which is attributable to the sum of the effects described above.

III. SIGNIFICANT OPPORTUNITIES AND RISKS

For a detailed description of our risk management system and potential opportunities and risks, please refer to the remarks on pages 68 ff. in the BRAIN Biotech AG Annual Report 2023/24.

Ongoing political bloc building, potential isolation of individual markets and erratic customs hurdles pose a clearly visible risk to the further development of economic momentum. The energy market situation proved to be relatively stable during the reporting period. However, gas and electricity prices remain volatile and further escalation of the geopolitical situation could lead to renewed erratic price increases at any time.

The supply chain situation for individual products remains tense. Logistics costs are currently very sensitive to geopolitical news, and delivery times have been extended in some cases due to the erratic customs situation in the US. The general financing situation and financing conditions remain challenging, especially for growth companies in the biotechnology sector. The US dollar has entered a phase of depreciation against the Euro with negative mainly translational effects on BRAIN Biotech.

IV. OUTLOOK

Due to the weakening general economic environment and strong currency fluctuations in the US dollar, the company now forecasts revenues in its core BRAINBiocatalysts segment for the full financial year 2024/25 to be around the previous year's level and thus below the original forecast (refer to page 66 of the Annual Report 2023/24). The forecasts for the adjusted EBITDA margin in this segment and the forecast for the BRAINBioIncubator segment remain unchanged.

SIGNIFICANT EVENTS

1 January 2025 to 31 March 2025

Biological gold recycling: BRAIN Biotech AG collaborates with PX Group on the PX Urban Mining Initiative

BRAIN Biotech AG and the PX Group, expert in the refining of precious metals from various segregated flows, are pleased to announce their collaboration within the framework of the PX Urban Mining Initiative. The extension of the partnership in this initiative stems from the successfully established collaboration between the two companies, which focused on developing a proof of concept for the biological recovery of gold from e-waste and other gold-containing side streams.

The new version (V2) of the BioXtractor (container-based mobile pilot plant) was financed by PX Group and is now jointly owned by BRAIN Biotech and PX Group. The container is located at the PX Group's site in La Chaux-de-Fonds, Switzerland, where the gold-containing side streams are gathered and processed. The partners aim to test its performance in a production environment and the first gold nuggets (BioGold™) were successfully produced from urban waste in 2024.

Results of the BRAIN Biotech AG Annual General Meeting 2025 for the financial year 2023/24

At the Annual General Meeting of BRAIN Biotech AG, which was held as face-to-face event on 18 March 2025, the shareholders approved all items on the agenda with a broad majority. The Management Board and Supervisory Board were discharged by a clear majority. Dr. Anna C. Eichhorn and Stephen Catling were re-elected to the Supervisory Board.

At the time of voting 63.8 % of the share capital was represented.

SELECTED NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS [UNAUDITED]

1 October 2024 to 31 March 2025

ACCOUNTING POLICIES

The Group interim report of BRAIN Biotech AG as at 31 March 2025 was prepared on the basis of IAS 34 (Interim Financial Reporting). All International Financial Reporting Standards (IFRS) that were binding as at the reporting date and had been adopted into European law by the European Commission were applied. The interim consolidated financial statements have not been audited in accordance with Section 317 of the German Commercial Code (HGB), nor have they been reviewed by an auditor.

SEGMENT REPORTING

The following changes have been implemented in the segment reporting compared to the consolidated financial statements as of 30 September 2024. The 'BioScience' segment was split and the activities were reallocated to the other segments as follows. BioScience Zwingenberg has been allocated to the former 'BioProducts' segment and was renamed '**BRAINBiocatalysts**'. The BRAIN Biotech branch AnalytiCon Discovery has been assigned to the '**Biolncubator**' segment. The previous year's figures have been adjusted accordingly.

The segment results¹ are presented in the following overview.

NUMBER OF EMPLOYEES IN THE GROUP⁴

Average for the reporting period	6M 2024/25	Fiscal Year 2023/24
Total employees, of which	285	307
Salaried employees	280	301
Industrial employees	5	6

⁴ Excluding the members of the parents' company's Management Board (2) and the subsidiaries' managing director

In the first quarter of 2024/25, 15 employees of BRAIN Biotech AG, who were assigned to the business unit which operated under the name Akribion Genomics, were transferred to Akribion Therapeutics GmbH as part of a transfer of operations.

Furthermore, BRAIN Biotech Group employs scholarship / grant holders 3 (FY 23/24: 4), temporary employees 4 (FY 23/24: 7) and trainees 8 (FY 23/24: 7).

RELATED PARTY TRANSACTIONS

A loan facility of €7.0 million exists with MP Beteiligungs-GmbH, a company with a shareholding of more than 25% in BRAIN Biotech AG. At the beginning of the financial year, €5.0 million of this amount had been utilised. This was repaid in full during the first half of the year. The agreement has a term until 30 June 2025.

Furthermore, in the first six months of the 2024/25 financial year, no transactions with related parties were concluded that were not already presented in the financial statements as at 30 September 2024, and that had a significant effect on the financial position and performance of the BRAIN Biotech Group.

EVENTS AFTER THE END OF THE QUARTER

BRAIN Biotech AG takes next step to optimize the group structure

BRAIN Biotech has acquired the remaining minority interests in its Dutch subsidiary Breatec B.V. With the completion of this transaction, all entities of the BRAINBiocatalysts segment are now wholly owned by BRAIN Biotech AG.

At the same time of this minority interest acquisition, a lease agreement was signed for a new location in the Netherlands. The new location will have significantly more space and is again in the south of the Netherlands, near the city of Den Bosch and conveniently located on the A59 motorway. The new location will serve as an integrated continental European production and storage centre. The company will also set up a test laboratory for baked goods there.

As part of this investment, the site in Büttelborn, Germany, which specialises in enzymes and starter cultures for beverage production, will be closed. Production will be relocated to the new site in the Netherlands. The competence centre for enzymes in beverage production will be moved to the R&D campus of BRAIN Biotech AG in Zwingenberg; most of the employees currently working in Büttelborn will also transfer to this location.

RESPONSIBILITY STATEMENT

According to the best of our knowledge and in accordance with applicable principles for interim reporting, the interim consolidated financial statements convey a true and fair view of the Group's financial position and performance. The interim Group management report conveys a true and fair view of the development and course of business operations as well as of the Group's position, and appropriately presents the significant opportunities and risks entailed in the Group's future development during the remaining months of the financial year.
